

# BIO - ENERGY SCIENCE

## BIO-ENERGY SCIENCE (BES)

### PRESS RELEASE

21.10.2019

### ANNOUNCEMENT

#### SUMMARY

AFTER YEARS OF RESEARCH & WORK IN THE FIELD OF BES, MAINLY IN THE FIELD OF SCIENCE & SPIRITUALITY I.E. RELIGION, THESE OBSERVATIONS/CONCLUSIONS WERE NOTED/ DETECTED.

In the past period of time, research has been done in the field of Bio-energy and results are published in the publications both in Macedonian & English, Light Part One / Research, that lasted from 1988 – 2016. Last published version of Light Part One, Bio-energy Research (Theoretical & Practical Presentation & Explanation of Bio-energy & Bio-energy therapy) was 2016.

In the same time, Light Part Two in Macedonian and English, and Light Intelligent Creation publication in English C-2012 was published.

Light Part 3 (Light Part 1,2,3, Life As We Don't Know It, Journey Into Mysterious Past and Glimpse into Glorious Future of Mankind), is prepared but not published due to other obligations. ...

In all these earlier mentioned publications and discussions, also in all interim papers, scientific approach towards various so-called para-phenomena is maintained, therefore scientific explanations and results of scientific experiments and discoveries in areas of interest of underlying issues were used.

Getting to the point.

From the viewpoint of Bio-energy Science (BES), which is supposed to be a bridge over the emptiness between Science, Spirituality & Religion, therefore bridge across time and space in development of humans and their organizational, cultural and civilizational structures, not going in details about it, we can say that in the past there were highly organized human societies with spikes in their development characterised by unusually high creative abilities in creating various structures and other objects, practices etc., mainly for worship, or similar structures with not enough knowledge about their purpose, found today as artefacts and witnesses of ancient beliefs and practices, therefore of ancient way of thinking and reasoning, living, which hard to admit but reality is that some of them are far beyond our understanding, limited by our low scientific knowledge therefore our limited development in research and technologies.

In the scope of the above, here we will mention in brief summary, our research observations and follow up's, and all of that will be accompanied with links to the articles and research papers/ abstracts or similar forms of presentations of ours and general, therefore scientific and spiritual/ religious communities, interests.

We will start with glimpse into ancient past, not interfering with religious teachings and beliefs systems nor with scientific official viewpoint, and according general understanding with what one can find reading and researching various documents, artefacts, research in the fields of interest, and archeological discoveries, as well.

According to evidence in the huge nowadays source of internet info's, one will notice that in the past most important therefore most investigated area/ region of interest was, and apparently still is the Middle East region, with accent on ancient Mesopotamia and Egypt regions, followed by India Pakistan border region, and yes Latin America. These regions are of importance because, firstly, Mesopotamia is connected with the beginning of human "modern" civilisation, and Egypt is a "magnet" because of unavoidable pyramids which can be found in Latin America as well, even though pyramids are observed in China, Russia/ Euro-Asia and other places on Earth, with their mysteries.

Connections to each other of all of these places, is their common form of "looking" and therefore symbolism and their practicing of mystical "magical" ceremonies with mystical experiences mainly explained to us through secret religious books and similar sources found nowadays around the world. From the BES viewpoint, not going into interpretation of any other matter than what is important to us here, to verify, and explain, and that is how meditation/ prayer is working, i.e. mechanism of meditation in human beings, therefore healing, gut feeling/sixth sense and similar so-called para phenomena.

In the final version of Light Part One, Research on Bio-energy Therapy, published 2016, it was elaborated that gut feeling is connected, i.e., is the effect of serotonin interacting with the other source on the Bio-energetic level. In other words, because serotonin is mainly in the stomach, and there is a huge web of nerve system mainly coming from nerve Vagus, therefore concentration of serotonin is huge, and in the case of Bio-energetic interactions (Bio-energy/BE, is defined as Quantum Electromagnetic Radiation, more in the text bellow), there is "communications" on that level, and depends on what interactions/ info's are taking place, that kind of reactions/ feelings/ sensations/ emotions... one will have. This interaction is "translated" by persons involved into this kind of interactions by having specific feelings/ sensations/ emotions... for that situations, which is similar in any, and every other similar situation for that kind of situations. Persons learn what is happening and therefore know what to expect in the future, i.e. persons learn and know how to translate that feelings, it might be with bad outcome or opposite, with a good one, for the persons involved in it. The path of this interactions, action-reaction system, if it goes in the brain, will have similar effect and could be experienced in that case with adequate emotions, feelings accompanied with other sensations.

Feelings specific for specific persons, bad or good, so they learn and know about them in their own ways, so it will be so-called sixth sense, or telepathy, or other mystical experiences that human beings are experiencing. These “phenomena” are maybe natural, but we lost connection with natural world of us so these “phenomena” seem to us very strange, mystified, far away from our natural world and from who we truly are. However, this time we are opening “Pandora’s Box” but with slow movements, and yes, above all with scientific knowledge about many mysteries, so there will be less surprises and finally we will discover our true nature and who we truly are.

At that stage about the above presentation, and about the mechanism of gut feeling, missing was the link, let’s say the missing link was how serotonin will travel into the brain through the brain barrier for us to have such feelings, emotions.... After few years in waiting, scientific knowledge improved, and now, there is an explanation in the form of an experiment done in Canada regarding this, in which they discovered that the Vagus nerve might serve as a type of "serotonin superhighway" between the gut and the brain.

<https://www.psychologytoday.com/us/blog/the-athletes-way/201910/the-vagus-nerve-may-carry-serotonin-along-the-gut-brain-axis>

“... Researchers at [McMaster University's Brain-Body Institute](#) (Canada) have been investigating a possible link between SSRI antidepressant medications, serotonin levels in the gut, and the role that vagus nerve stimulation might play in boosting gut-to-brain transport of serotonin, which appears to rely on the vagus nerve.

Notably, after a vagotomy—which surgically cuts off gut-to-brain communication via the vagus nerve—SSRIs lose their ability to relieve depression-like symptoms in mice.

As part of the bidirectional gut-brain axis, afferent [vagal](#) nerves send signals from the bottom-up. There is reason to believe that these vagus nerve pathways might serve as a type of "serotonin superhighway" between the gut and the brain. ...”

With the above entry of results from research at McMaster University’s Brain-Body Institute in Canada, the theoretical presentation of gut feeling/ sixth sense mechanism is done.

After research on Bio-energy was completed, theoretical explanation and presentation of Bio-energy as Quantum- electromagnetic radiation (QEMR), radiation from human cells i.e. DNA, was presented using explanation about its electromagnetic component, from research from the Czech Republic, ( J. Lipkova and J. Cechak, prove the existence of the electromagnetic component of the energy field around humans and that it can be measured, “HUMAN ELECTROMAGNETIC EMISSION IN THE ELF BAND”...).

The other component of Bio-energy (BE), quantum component that exists in humans, was explained using research done in Japan by Masaki Kobayashi, Daisuke Kikuchi and Hitoshi Okamura proving that photon/quantum radiation indeed exists around humans, and is with/from DNA i.e is with genetic origin, so quantum component (light component) of Bio-energy that radiates around humans, was explained (“IMAGING OF ULTRAWEAK SPONTANEOUS PHOTON EMISSION FROM THE HUMAN BODY DISPLAYING DIURNAL RHYTHM”).

[http://www.globaldialoguefoundation.org/files/GDF%20News-BE\\_8Mar2016.pdf](http://www.globaldialoguefoundation.org/files/GDF%20News-BE_8Mar2016.pdf)

Explaining Bio-energy components, Bio-energy therapy was explained too, as radiation from practitioner influencing therefore initiating/ causing vibrations in the treated person cells of various organs, nerves, etc., which once stimulated, because of QEMR superiority of the practitioner, they start vibrating, resonating, therefore producing BE in that form and with that frequency, which is missing, and after they start gaining higher energy levels, they are starting to function normal as before when the health was maintained and ill state of mind, body and soul was absent. Secretion of various substances or various other interactions are taking place with positive results on treated persons health, which are taking place as quick as possible i.e. straight away or after some time.

Above is important to know because it touches sensitive topics regarding Bio-energy practice as therapy/healing which is used to improve whole body systems on physical, as well on mental / spiritual level/state. In this process, with accent on those treated for mental/ spiritual needs/ problems, it needs to be said that those treated with Bio-energy use to feel very comfortable, very relaxed state similar to meditation, yoga, prayer, or similar sleepy state to one when they very relaxed after good sleep, because some of them were falling asleep while under therapy without even touching their heads, nor had eye contact or suggestion nor have any verbal communication. Some of the treated persons use to see colours or had similar experiences to it, (we are not going to explain in details

those experiences mainly to avoid speculations regarding the mystical nature of them, which were very close to what is described about pituitary gland, explanations given further in the text below), which we can explain now, with latest results of experiments below. Before we go to present findings, it is important to cite few sentences from research here regarding previous “mystical” entry so the public in advance will know what this is about, and yes it is about dimethyltryptamine (DMT).

Medical research

JUNE 27, 2019

## 'Mystical' psychedelic compound found in normal brains

by University of Michigan

“...In the past few years, thrill-seekers from Hollywood, Silicon Valley and beyond have been travelling to South America to take part in so-called Ayahuasca retreats. Their goal: to partake in a brewed concoction made from a vine plant *Banisteriopsis caapi*, traditionally used by indigenous people for sacred religious ceremonies. Drinkers of Ayahuasca experience short-term hallucinogenic episodes many describe as life-changing.

The active ingredient responsible for these psychedelic visions is a molecule called dimethyltryptamine (DMT). For the first time, a team led by Michigan Medicine has discovered the widespread presence of naturally-occurring DMT in the [mammalian brain](#). The finding is the first step toward studying DMT— and figuring out its role—

within the brains of humans.

“...A paper published in 2018 by researchers in the U.K. purported that DMT simulates the near death experience, wherein people report the sensation of transcending their bodies and entering another realm. ...”

## **'Mystical' psychedelic compound found in normal brains**

<https://medicalxpress.com/news/2019-06-mystical-psychedelic-compound-brains.html>

“...For the first time, a team led by Michigan Medicine has discovered the widespread presence of naturally-occurring DMT in the [mammalian brain](#). The finding is the first step toward studying DMT— and figuring out its role—within the brains of humans.

"DMT is not just in plants, but also can be detected in mammals," says Jimo Borjigin, Ph.D., of the Department of Molecular and Integrative Physiology. Her interest in DMT came about accidentally. Before studying the psychedelic, her research focused on melatonin production in the [pineal](#) gland...

...The core idea seems to come from a documentary featuring the work of researcher Rick Strassman, Ph.D. with the University of New Mexico School of Medicine. In the mid-1990s, he conducted an experiment in which human subjects were given DMT by IV injection and interviewed after its effects wore off. In a documentary about the experiment, Strassman claims that he believed the pineal gland makes and secretes DMT...

....Using a process in which microdialysis tubing is inserted into a rat brain through the pineal gland, the researchers collected a sample that was analyzed for—and confirmed—the presence of DMT. That experiment resulted in a paper published in 2013.

... Jon Dean, lead author of the paper, set up an experiment using a process called *in situ* hybridization, which uses a labeled complementary strand of DNA to localize a specific RNA sequence in a tissue section.

"With this technique, we found brain neurons with the two enzymes required to make DMT," says Borjigin. And they were not just in the [pineal gland](#).

"They are also found in other parts of the brain, including the neocortex and hippocampus that are important for higher-order brain functions including learning and memory."

The results are published in the journal *Scientific Reports*. Her team's work has also revealed that the levels of DMT increase in some rats experiencing cardiac arrest. A paper published in 2018 by researchers in the U.K. purported that DMT simulates the near death experience, wherein people report the sensation of transcending their bodies and entering another realm."

## **Biosynthesis and Extracellular Concentrations of N,N-dimethyltryptamine (DMT) in Mammalian Brain**

### **Abstract**

*N,N*-dimethyltryptamine (DMT), a psychedelic compound identified endogenously in mammals, is biosynthesized by aromatic-*L*-amino acid decarboxylase (AADC) and indolethylamine-*N*-methyltransferase (INMT). Whether DMT is biosynthesized in the mammalian brain is unknown. We investigated brain expression of INMT transcript in rats and humans, co-expression of INMT and AADC mRNA in rat brain and periphery, and brain concentrations of DMT in rats. INMT transcripts were identified in the cerebral cortex, pineal gland, and choroid plexus of both rats and humans via *in situ* hybridization. Notably, INMT mRNA was colocalized with AADC transcript in rat brain tissues, in contrast to rat peripheral tissues where there existed little overlapping expression of INMT with AADC transcripts. Additionally, extracellular concentrations of DMT in the cerebral cortex of normal behaving rats, with or without the pineal gland, were similar to those of canonical monoamine neurotransmitters

including serotonin. A significant increase of DMT levels in the rat visual cortex was observed following induction of experimental cardiac arrest, a finding independent of an intact pineal gland. These results show for the first time that the rat brain is capable of synthesizing and releasing DMT at concentrations comparable to known monoamine neurotransmitters and raise the possibility that this phenomenon may occur similarly in human brains....”

Recently discovered was that pineal gland is like soft gel containing micro crystals with piezoelectric properties. It seems that when under Bio-energy therapy, under influence of the practitioner’s Bioenergy as QEMR, Bio-energy waves/vibrations/ radiations..., from practitioner are influencing, stimulating cells in the brain, including pituitary/ pineal gland and surrounding tissue... . Under those circumstances, the pineal gland’s crystals are “disturbed” so they vibrate, producing their piezoelectric effect which starts to vibrate and stimulate other cells in the region which are starting to produce various morphine like substances and / or various neurotransmitters, including DMT/ Dimethyltryptamine. Under those circumstances and under influence of these substances/ neurotransmitters, the brain and whole system, whole body, is reacting and acting/ experiencing the effect of these practices and these substances, as described here and in the scientific papers, as well in those papers/ articles from general public info’s cites.

Department of Chemical Engineering, Ben-Gurion University of the Negev, 84105 Beer Sheva, Israel.

### Abstract

A new form of biomineralization has been studied in the pineal gland of the human brain. It consists of small crystals that are less than 20 microm in length and that are completely distinct from the often observed mulberry-type hydroxyapatite concretions. A special procedure was developed for isolation of the crystals from the organic matter in the pineal gland. Cubic, hexagonal, and cylindrical morphologies have been identified using scanning electron microscopy. The crystal edges were sharp whereas their surfaces were very rough. Energy dispersive spectroscopy showed that the crystals contained only the elements calcium, carbon, and oxygen. Selected area electron diffraction and near infrared Raman spectroscopy established that the crystals were calcite. With the exception of the otoconia structure of the inner ear, this is the only known nonpathological occurrence of calcite in the human body. The calcite microcrystals are probably responsible for the previously observed second harmonic generation in pineal tissue sections. The complex texture structure of the microcrystals may lead to crystallographic symmetry breaking and possible piezoelectricity, as is the case with otoconia. It is believed that the presence of two different crystalline compounds in the pineal gland is biologically significant, suggesting two entirely different mechanisms of formation and biological functions. Studies directed toward the elucidation of the formation and functions, and possible

nonthermal interaction with external electromagnetic fields are currently in progress.  
Copyright 2002 Wiley-Liss, Inc..."

What is important from us to say at this moment regarding the above entry - it is a theoretical presentation of the above-mentioned mechanism of Bio-energy therapy/ healing, but also it is theoretical explanation of the mechanism of meditation and other similar so-called mystical/ para-phenomena, which are described in religions and spiritual branches and teachings in human society throughout history.

From a BES point of view, we will conclude, that with the explanation of above, and experienced similarities/almost identical, (and even better feelings and sensations in some cases were described), sensations, feelings and even visions of colours, of treated persons, specially those who were practicing meditation, yoga, prayer, or similar relaxation practices and/ or techniques, and who were aware of the state that they were achieving during the practices, so they could make comparison between two practices, and they were aware what to expect therefore were able to give accurate statement of their experience during and after the BE treatment. State achieved during the Bio-energy therapy was, as was declared by some of treated persons, similar, same, or even better than meditation, yoga and similar practices for mind body and soul that they were practising, or that they were aware of them in various, personal ways.

It is important to mention that during these treatments, not just treated persons who had BE therapy therefore were under influence of QEMR superiority of the practitioner, were experiencing good vibrations and sensations, feelings of comfortable relaxed dreamy state feeling with visions of colours, but also BE practitioner had similar experience and sometimes visions of colours and other phenomena like those described in/ with astral projections or similar terms. Practitioner was a medical doctor with experience in general medicine and also universal knowledgeable person with experience and knowledge about alternative medicine, meditation, deep prayer, etc.

As it was mentioned in the beginning of this presentation, regarding the ancient civilisations, their constructions connected with their beliefs and spiritual/ religious practices, rituals, often described as mystical or with similar exotic terms, here we will say a word about the mechanism of those practices used in various religions and spiritual teachings, as well other traditional religious systems, teachings practices, rituals and similar, such as shamanism etc., around the globe, from ancient times to nowadays, and will continue as such in the future, which are very close if not almost identical with above entries, especially those regarding mechanism of meditation presented above.

Getting to the point.

It is well known that in the eastern and as well in the western societies spiritual/religious teachings and practices, such as yoga, meditations, prayers/ deep prayers, transcendental meditations etc., people, practitioners, are awakening chakras or/ and spiritual centres in the body, therefore the whole system, and are experiencing spiritual experiences apart of experiencing relaxation and peaceful comfortable state/feeling of mind body and soul. These states are achieved by using breathing (usually deep breath), with various rhythm of breathing (usually slow breathing), as well chanting, praying using usually deep tones, also by use of inner movements of the internal organs specially in Kundalini yoga, well known to experienced practitioners, and similar techniques. As was stated above, in meditations, prayers, specially in deep prayers and transcendental meditations, those involved in these or similar practices, are using deep breath with deep tones/ sounds and words such as ohm, or/and amen or similar.

From the BES point of view, in the scope of the theme of the discussion, here we will say that in all these spiritual practices, rituals etc., mentioned above, (and/or similar not mentioned here but

existing in the world), common for almost all of them as was said is breathing, chanting, using words, characterised with deep tonality, using movements of inner organs, etc., so all of these practices are making body cells to vibrate, they are producing vibrations of the cells, and as a result from tones, from breathing, from inner organs movements, or movements of body in general, etc., those vibrations are also stimulating the central nervous system, which is the main purpose, so this is the case with the pineal gland, as well. Somehow, this process is affecting/ disturbing and initiating pineal gland micro crystals to vibrate and to start realising their piezoelectric effects therefore stimulating pineal gland to realise **Ndimethyltryptamine (DMT) in more quantity as usual**, as well stimulating and initiating surrounding cells to secrete various substances, neurotransmitters. In other words, the brain is stimulated to start producing various substances, neurotransmitters, including above mentioned substance as central point of discussion in this presentation, and that is **Ndimethyltryptamine (DMT)**, apparently the main reason for these mystical phenomena, which are taking part in these ceremonies, giving these mystical experiences and outcomes a spiritual exotic desirable result. It is worth to mention that in these practices many are using various drinks or similar substances, like various substances coming from various plants, mushrooms etc., to achieve same desirable effect.

These vibrations of the body in the practices like meditations, prayer, BE healing etc., are giving same/ similar effect like those when people are using various substances, drinks or similar, so bottom line is that practicing meditations, prayers and other relaxation techniques, as well as doing bio-energy therapy/ healing, are giving same or similar desirable effect and are/ will/ should be use as appropriate replacement therapies and lifestyle practices in the future world. With these mentioned practices, enlightening the body, enlightening the environment will give enlightenment to this world and other realms of existence around us, (going deeply with explanation in these field is not the purpose of this presentation), and **this is a recommendation** coming from this presentation as a result and all this work done in past few decades on this topic.
