GDF forms partnership with the UN Alliance of Civilizations

Peter (Pece) Gorgievski - GDF

27 May 2010

At the Open Space of the UN Alliance of Civilizations Forum in Rio de Janeiro, Global Dialogue Foundation's C.E.O & Director General Mr. Peter (Pece) Gorgievski's presentation drew attention to the foundation's mission by outlining its Project "Unity in Diversity".

During a lunch this week by invitation from The President of the Federative Republic of Brazil, Luiz Inacio Lula da Silva, Mr. Gorgievski aims to further raise the profile of Global Dialogue Foundation with high-level government and non-government representatives from around the world.

Global Dialogue Foundation is passionate about tackling and resolving the most prevalent issues on our planet using what is perhaps one of the most under-used and most powerful resources for overcoming important issues - dialogue.

It is Global Dialogue Foundation's inspiration to gather together the right individuals who care about our planet and the kind of world we are living in, to ENSURE that we make it a better place. It is the responsibility not just of the governments (who don't always solve the issues that are most important, if at all) and larger corporations to improve our planet - it is the responsibility of every person.

The foundation's MISSION is to create platforms that bring together individuals, organisations and nations through dialogue and action.

The inaugural Unity in Diversity event; 10.10.10 Pacific Dialogue Summit, is being held during October this year in Melbourne. The event will bring together representatives from government and non-government organizations, traditional faiths and religions, civil society and corporations and businesses to develop solutions and agree on joint actions in the following key areas:
Culture - building bridges across cultures in the region and opening new pathways for collaboration.
Health & Education - increasing availability through redistributing under-utilised resources.
Marine - negotiating solutions for cleaning plastic waste in the oceans and developing a prevention plan.
Environmental displacement - negotiating solutions for soon-to-be displaced citizens in the Pacific.
