

## Mankind Destiny

## By Dr. Yasko M. Najdovski

Time is unstoppable - passing by ... Eons, ... millenniums have passed by...

Good or bad time, so black or grey, colorful or sunny, as each of Good of bad Time, so black of grey, colortul of sunny, as each of them and their presence was back then, they have painted our mem and meir presence was back men, mey nave painted our memories with the same colour as we remember it in our short memories with the same colour as we remember if in our short collective memory. Painting time and space with that color and conective memory, rainting time and space with that color and leaving an imprint in our time and space dimension, each of them teaving an imprint in our time and space aimension, each or them giving the best they could give. In that moment, they have painted giving the best they could give, in that moment, they have painted with the same color not only the time and space of their time and with the same color hot only the time and space of their time and space, but the time and space of a whole generation back then. space, but the time and space of a whole generation back then, making it look bad or good, black or white, grey or sunny,... and only making it took bad or good, black or write, grey or sunny,... and only at one moment it became infinity and eternity - in one, time and at one moment it became intinity and elernity - in one, time and space all at once, all as one, all in one, only at one moment, making space au ar once, au as one, au in one, only ar one moment, making and achieving that moment to be the pick of creative evolution for and achieving that moment to be the pick of creative evolution for that particular generation and maybe generations to come for the mar particular generation and maybe generations to come for the whole of mankind. Good or bad ... at one time only. whose of manking, Good of bad ... at one time only,

From our perspective, time is same, space is same, back then, when trom our perspective, time is same, space is same, back then, when ever, where ever, denerations after that "pick" of development, where going with their pasiness as a nsual — only richer or poorer, for were going with their business as a usual — only richer or boorer, for were going with their business as a usual — only richer or boorer, for were going with their business as a usual — only richer or boorer, for something that was missing, adding to their quality of life. But it was something that was missing, adding to their quality of life. But it was something that was missing, adding to their quality of life. But it was

Memories are made for that too ...

Memories are made for that too ...

them, at that time only, Each and every generation have good or bad times, and all were / are longing tor good old times, as were once...

times, and all were / are longing tor good old times, as were once...

times, and all were / are longing tor good old times, as were once...

Memories are made for that too ...

Memories are made for that too ...

Willenniums were bassing and are bassing by. As before, as is today—

Mille

Again today, mankind is on it, s way to find and bin-boint it, s own bick' good or bad' ... the tob and maximum of development, closer to be temembered as good and sunny for generations to come, bicking a direction tor the future, which has been on agendas for a long time, direction to the future, which has been on agendas for a long time. What the future might be, is on the other side of the edge— the other direction to the future, which has been on agendas for a long time. What the future might be, is on the other side of the edge— the other side of the edge— the other what the future might be, is on the other side of the edge— the othe

Mankind and generations of men and women are looking back and manking and generations of men and women are tooking back and have clear vision of our past, have good insight in our present, so they nave clear vision of our past, nave good insignt in our present, so mey can see more clearly, what might be the future. This time will be can see more clearly, what might be the future, this time will be different than before. The future of mankind will be given to the anterent man before, the future of manking will be given to the people to choose for themselves- out of many dark scenarios to people to choose for memselves" out of many dark scenarios to choose one sunny reality for all on this planet, so there is no other choose one sunny reality for all on this planet, so there is no other planet Earth for us yet. The path is traced, and needs to be clearly planet cann for us yet, the pain is traced, and needs to be clearly sighted and paved. Signied and pavea.

This time and later, generations can live in their past, or/and in their put time and later, generations can live in their bast, or/and in their post, or/and in their should be good, and is good — and for good....

should be good, and is good — and for good....

Good Luck ...

50, where there is dialogue, there is peace.

Where there is peace there is culture.

Where there is culture, there is progress.
